

## Contents

### Gas Sensors

- Material and design considerations for low-power microheater modules for gas-sensor applications. . . . . 343  
S. Möller, J. Lin, E. Obermeier (Berlin, Germany)
- Pore size and pore-size distribution control of porous silica . . . . . 347  
X. Yao, L. Zhang, S. Wang (Xi'an, China)
- A new type of gas sensor based on the semiconductor-cleft-semiconductor structure . . . . . 353  
V.M. Aroutiounian, Kh.V. Nerkararian (Yerevan, Armenia)
- Capacitive sensors in CMOS technology with polymer coating . . . . . 357  
C. Cornila (Zurich, Switzerland), A. Hierlemann (Tübingen, Germany), R. Lenggenhager, P. Malcovati, H. Baltes (Zurich, Switzerland), G. Noetzel, U. Weimar, W. Göpel (Tübingen, Germany)
- Steady-state model of a zirconia oxygen sensor in a simple gas mixture . . . . . 362  
A.D. Brailsford, M. Yussouff, E.M. Logothetis, M. Shane (Dearborn, MI, USA)
- Reception tuning of gas-sensor microsystems by selective coatings: . . . . . 366  
P. Althainz, A. Dahlke, M. Frietsch-Klarhof, J. Goschnick, H.J. Ache (Karlsruhe, Germany)
- Donor-doped  $Gd_2Ti_2O_7$  as a semiconductor-type oxygen sensor. . . . . 370  
I. Kosacki, H.L. Tuller (Cambridge, MA, USA)
- Semiconductor dimethylamine gas sensors with high sensitivity and selectivity . . . . . 375  
Y. Takao, M. Nakanishi, T. Kawaguchi, Y. Shimizu, M. Egashira (Nagasaki, Japan)
- A tip-type carbon dioxide gas-sensor probe based on lithium and oxide ionic conductors . . . . . 380  
N. Imanaka, Y. Hirota, G. Adachi (Suita Osaka, Japan)
- A.c. impedance analysis of gas-sensing property in  $CuO/ZnO$  heterocontacts. . . . . 383  
M. Miyayama, K. Hikita, G. Uozumi, H. Yanagida (Tokyo, Japan)
- Metal oxide semiconductor  $NO_2$  sensor. . . . . 388  
T. Inoue, K. Ohtsuka, Y. Yoshida, Y. Matsuura, Y. Kajiyama (Osaka, Japan)
- Capacitive-type sensors for the selective detection of nitrogen oxides. . . . . 392  
T. Ishihara, S. Sato, Y. Takita (Oita, Japan)
- Application of metal tungstate-carbonate composite to nitrogen oxides sensor operative at elevated temperature . . . . 396  
J. Tamaki, T. Fujii, K. Fujimori, N. Miura, N. Yamazoe (Fukuoka, Japan)
- Physical description of the principle of an  $SO_2$  sensor. . . . . 400  
M. Horn, J. Pichlmaier, H.-R. Tränkler (Neubiberg, Germany)
- Combustion gas sensitivity of zeolite layers on thin-film capacitors . . . . . 403  
C. Plog, W. Maunz, P. Kurzweil (Friedrichshafen, Germany), E. Obermeier, C. Scheibe (Berlin, Germany)
- Development and testing of a solid-state  $CO_2$  gas sensor for use in reduced-pressure environments . . . . . 407  
L.W. Mason (Denver, CO, USA), S. Oh, J.P. Joseph (Menlo Park, CA, USA)
- A capacitive  $CO_2$  sensor with on-chip heating . . . . . 412  
D. Mutschall, E. Obermeier (Berlin, Germany)
- The thick-film route to selective gas sensors . . . . . 415  
F. Ménil, C. Lucat, H. Debéda (Talence, France)
- A polycrystalline diamond thin-film-based hydrogen sensor. . . . . 421  
W.P. Kang, Y. Gurbuz, J.L. Davidson, D.V. Kerns (Nashville, TN, USA)
- A new method using a catalytic sensor for the identification and concentration measurement of combustible gases 426  
G. Rose, I. Zdanevitch (Verneuil-en-Halatte, France)

Vapour and gas sensing by noise measurements on polymeric balanced bridge microstructures . . . . .	429
P. Bruschi, A. Nannini, B. Neri (Pisa, Italy)	
Highly sensitive and selective H <sub>2</sub> S gas sensor from r.f. sputtered SnO <sub>2</sub> thin film . . . . .	433
T. Mochida, K. Kikuchi, T. Kondo (Yokohama, Japan), H. Ueno, Y. Matsuura (Osaka, Japan)	
Amperometric response of ambient temperature oxygen sensors based on insulating material-dispersed PbSnF <sub>4</sub> layers . . . . .	438
H. Hanamoto, K. Tsuchiya, J. Kuwano (Tokyo, Japan)	
Detection of organic solvents with reliable chemical sensors based on cellulose derivatives . . . . .	443
R. Zhou, A. Hierlemann, K.D. Schierbaum, K.E. Geckeler, W. Glöpel (Tübingen, Germany)	
The influence of morphology on the response of iron-oxide gas sensors . . . . .	448
P. Althainz, L. Schuy, J. Goschnick, H.J. Ache (Karlsruhe, Germany)	
Gas sensing using a charge-flow transistor . . . . .	451
P.S. Barker, C. Di Bartolomeo, A.P. Monkman, M.C. Petty (Durham, UK), R. Pride (Loughborough, Leicestershire, UK)	
Transition between neck-controlled and grain-boundary-controlled sensitivity of metal-oxide gas sensors . . . . .	454
X. Wang, S.S. Yee, W.P. Carey (Seattle, WA, USA)	
Development of a fiber-optic chemical sensor for multicontaminant monitoring of environmental systems . . . . .	458
K.M. Leonard (Huntsville, AL, USA)	
On-line chemical sensors for high-temperature coal gases: the influence of humidity . . . . .	462
F. De Schutter, J. Vangrunderbeek, J. Luyten, W. Engelen (Mol, Belgium)	
SnO <sub>2</sub> thin films for gas sensor prepared by r.f. reactive sputtering . . . . .	465
M. Di Giulio, G. Micocci, A. Serra, A. Tepore, R. Rella, P. Siciliano (Lecce, Italy)	
The influence of deposition parameters on the performance of tin dioxide NO <sub>2</sub> sensors prepared by radio-frequency magnetron sputtering . . . . .	469
G. Williams, G.S.V. Coles (Swansea, UK)	
Surface morphology and gas-sensing characteristics of SnO <sub>2-x</sub> thin films oxidized from Sn films . . . . .	474
K.S. Yoo, N.W. Cho, H.S. Song, H.J. Jung (Seoul, South Korea)	
Tin oxide micro gas sensor for detecting CH <sub>3</sub> SH . . . . .	478
H.S. Park, H.W. Shin, D.H. Yun, H.-K. Hong, C.H. Kwon, K. Lee, S.-T. Kim (Seoul, South Korea)	
Characterization of porous tin oxide thin films and their application to microsensor fabrication . . . . .	482
W.-Y. Chung (Jecheon, South Korea), T.-H. Kim, Y.-H. Hong, D.-D. Lee (Taegu, South Korea)	
CO gas sensor based on Au-La <sub>2</sub> O <sub>3</sub> loaded SnO <sub>2</sub> ceramic . . . . .	486
K. Fukui, M. Nakane (Osaka-shi, Japan)	
The effect of humidity on tin-oxide thick-film gas sensors in the presence of reducing and combustible gases . . . . .	491
D.S. Vlachos, P.D. Skafidas, J.N. Avaritsiotis (Athens, Greece)	
Simulation of the effect of fractional dimension on tin-oxide-based gas sensors . . . . .	495
D.S. Vlachos, J.N. Avaritsiotis (Athens, Greece)	
Sensing characteristics of ISFET-based hydrogen sensor using proton-conductive thick film . . . . .	499
N. Miura, T. Harada, N. Yoshida, Y. Shimizu, N. Yamazoe (Fukuoka, Japan)	
Thin tin-oxide film alcohol-gas sensor . . . . .	504
L. Promsong, M. Sriyudthsak (Bangkok, Thailand)	
The influence of the tin-oxide deposition technique on the sensitivity to CO . . . . .	507
M.C. Horrillo, J. Gutiérrez, L. Arés, J.I. Robla, I. Sayago, J. Getino, J.A. Agapito (Madrid, Spain)	
The interaction of different oxidizing agents on doped tin oxide . . . . .	512
I. Sayago, J. Gutiérrez, L. Arés, J.I. Robla, M.C. Horrillo, J. Getino, J.A. Agapito (Madrid, Spain)	
Temperature dependencies of sensitivity and surface chemical composition of SnO <sub>x</sub> gas sensors . . . . .	516
G. Gaggiotti (Rome, Italy), A. Galdikas (Vilnius, Lithuania), S. Kačiulis (Rome, Italy and Vilnius, Lithuania), G. Mattogno (Rome, Italy), A. Šetkus (Vilnius, Lithuania)	
Moisture effects on pure and Pd-doped SnO <sub>2</sub> thick films analysed by FTIR spectroscopy and conductance measurements . . . . .	520
G. Ghiotti, A. Chiorino (Turin, Italy), G. Martinelli, M.C. Carotta (Ferrara, Italy)	

Comparison between two Figaro sensors (TGS 813 and TGS 842) for the detection of methane, in terms of selectivity and long-term stability . . . . .	525
P. Massok, M. Loesch, D. Bertrand (La Plaine Saint Denis, France)	
Ca- and Pt-catalysed thin-film SnO <sub>2</sub> gas sensors for CO and CO <sub>2</sub> detection . . . . .	529
K. Steiner, U. Hoefer, G. Kühner, G. Sulz, E. Wagner (Freiburg, Germany)	
A cluster approach for the adsorption of oxygen and carbon monoxide on SnO <sub>2</sub> and CdS surfaces . . . . .	532
T.S. Rantala (Oulu, Finland), V. Golovanov (Odessa, Ukraine), V. Lantto (Oulu, Finland)	
Tin oxide (SnOx) carbon monoxide sensor fabricated by thick-film methods . . . . .	537
P.P. Tsai, I.-C. Chen, M.H. Tzeng (Hsinchu, Taiwan)	
An IR study of CO-sensing mechanism on Au/ZnO . . . . .	540
F. Boccuzzi, A. Chiorino (Turin, Italy), S. Tsubota, M. Haruta (Ikeda, Japan)	
A selective CH <sub>4</sub> sensor using semiconducting Ga <sub>2</sub> O <sub>3</sub> thin films based on temperature switching of multigas reactions . . . . .	544
M. Fleischer, H. Meixner (Munich, Germany)	
Aqueous ozone detector using In <sub>2</sub> O <sub>3</sub> thin-film semiconductor gas sensor . . . . .	548
T. Takada, H. Tanjou, T. Saito (Osaka, Japan), K. Harada (Tokyo, Japan)	
Physical interpretation of the influence of humidity on an SO <sub>2</sub> sensor . . . . .	552
J. Pichlmaier (Neubiberg, Germany)	
Research and development of gas sensors in China . . . . .	555
Y.-L. Xu, X.-H. Zhou, S.-D. Cai, Y.-C. Xu (Xian, China)	
Ultrafine grain-size tin-oxide films for carbon monoxide monitoring in urban environments . . . . .	559
G.B. Barbi, J.P. Santos, P. Serrini, P.N. Gibson, M.C. Horrillo, L. Manes (Ispra VA, Italy)	
Chemical and electronic characterization of pure SnO <sub>2</sub> and Cr-doped SnO <sub>2</sub> pellets through their different response to NO . . . . .	564
G. Ghiotti, A. Chiorino, F. Prinetto (Turin, Italy)	
Structural and electrical characterization of PVD-deposited SnO <sub>2</sub> films for gas-sensor application. . . . .	568
H.-J. Michel, H. Leiste, J. Halbritter (Karlsruhe, Germany)	
A study of tin-dioxide gas-sensor thermochemistry under conditions of varying oxygen partial pressure . . . . .	573
G. Williams, G.S.V. Coles (Swansea, UK)	
Sensor-array calibration time reduction by dynamic modelling. . . . .	578
C.Di Natale (Rome, Italy), S. Marco (Barcelona, Spain), F. Davide (Monteluco di Roio, L'Aquila, Italy), A. D'Amico (Rome, Italy)	
Development of a high-temperature basic device for chemical sensors based on an IDC with on-chip heating . . . . .	584
C. Scheibe, E. Obermeier (Berlin, Germany), W. Maunz, C. Plog (Friedrichshafen, Germany)	
A novel method for the preparation of NH <sub>3</sub> sensors based on ZnO-In thin films . . . . .	588
G. Sberveglieri, S. Groppelli, P. Nelli (Brescia, Italy), A. Tintinelli, G. Giunta (Monterotondo, Italy)	
A study of gas-sensing properties of sputtered $\alpha$ -SnWO <sub>4</sub> thin films . . . . .	591
J.L. Solis, V. Lantto (Oulu, Finland)	
Response of lead phthalocyanine to high NO <sub>2</sub> concentration . . . . .	596
A. Mrwa, M. Friedrich, A. Hofmann, D.R.T. Zahn (Chemnitz, Germany)	
Microstructure and response behaviour of electrodes for CO <sub>2</sub> gas sensors based on solid electrolytes . . . . .	600
A. Dubbe (Matsuyama, Japan), H.-D. Wiemhöfer (Tübingen, Germany), Y. Sadaoka (Matsuyama, Japan), W. Göpel (Tübingen, Germany)	
CH <sub>4</sub> optical sensor using a 1.31 $\mu$ m DFB laser diode . . . . .	603
J.P. Silveira, F. Grasdepot (Montrouge, France)	
Carbon dioxide sensor using NASICON prepared by the sol-gel method . . . . .	607
D.-D. Lee (Taegu, South Korea), S.-D. Choi (Kyongsan, South Korea), K.-W. Lee (Taejon, South Korea)	
Thick-film zinc-oxide gas sensor for the control of lean air-to-fuel ratio in domestic combustion systems. . . . .	610
C.H. Kwon, H.-K. Hong, D.H. Yun, K. Lee, S.-T. Kim, Y.-H. Roh, B.-H. Lee (Seoul, South Korea)	
A comparison of conductance behaviour between SnO <sub>2</sub> and CdS gas-sensitive films . . . . .	614
V. Lantto (Oulu, Finland), V. Golovanov (Odessa, Ukraine)	
Selective nitrogen dioxide sensor based on nickel copper oxide mixed with rare earths. . . . .	619
S. Banno, N. Imanaka, G. Adachi (Osaka, Japan)	

Zinc-oxide-based semiconductor sensors for detecting acetone and capronaldehyde in the vapour of consommé soup Y. Anno, T. Maekawa, J. Tamaki (Kasuga, Fukuoka, Japan), Y. Asano, K. Hayashi (Tokyo, Japan), N. Miura, N. Yamazoe (Kasuga, Fukuoka, Japan)	623
Influence of chemical composition on sensitivity and signal reproducibility of CdS sensors of oxygen V. Smyntyna, V. Golovanov (Odessa, Ukraine), S. Kačiulis, G. Mattogno, G. Righini (Rome, Italy)	628
Study of the behaviour of CeO <sub>2</sub> in SO <sub>2</sub> -containing environment E.B. Várhegyi (Budapest, Hungary), J. Gerblinger (Munich, Germany), F. Réti, I.V. Perczel (Budapest, Hungary), H. Meixner (Munich, Germany)	631
CO <sub>2</sub> monitoring by solid-state limiting-current sensors D. Narducci, L. Facheris, C.M. Mari (Milan, Italy)	636
Sensitivity mechanism of metal oxides to oxygen detected by means of kinetic studies at high temperatures J. Gerblinger, U. Lampe, H. Meixner (Munich, Germany)	639
Response of chemically modified PrPc <sub>2</sub> , PrPc <sub>2</sub> <sup>1</sup> and GdPc <sub>2</sub> <sup>1</sup> Langmuir-Blodgett films to tobacco smoke M.L. Rodriguez-Méndez, M.I. Gobernado-Mitre, J. Souto, J. de Saja-González, J.A. de Saja (Valladolid, Spain)	643
Interaction between collective and local subsystems in semiconductor surface-active structures V. Golovanov, V. Smyntyna (Odessa, Ukraine)	647
Impedance of zeolite-based gas sensors P. Kurzweil, W. Maunz, C. Plog (Friedrichshafen, Germany)	653
Carbon-monoxide sensors based on thin films of BaSnO <sub>3</sub> U. Lampe, J. Gerblinger, H. Meixner (Munich, Germany)	657
NO <sub>2</sub> sensitive LaFeO <sub>3</sub> thin films prepared by r.f. sputtering E. Traversa (Rome, Italy), S. Matsushima, G. Okada, Y. Sadaoka, Y. Sakai, K. Watanabe (Matsuyama, Japan)	661
A new method for on-vehicle detection of catalyst malfunction based upon measurement of non-equilibrated gas mixtures P.G. Eastwood, S. Fischer, M. Schweizer-Berberich (Tübingen, Germany), G. Girardi (Milan, Italy), W. Göpel (Tübingen, Germany)	665
Organometallic polymer membrane for gas detection applied to a surface acoustic wave sensor C. Caliendo, E. Verona, A. D'Amico, A. Furlani, G. Infante, M.V. Russo (Rome, Italy)	670
Niobium-doped $\alpha$ -Fe <sub>2</sub> O <sub>3</sub> semiconductor ceramic sensors for the measurement of nitric oxide gases C. Cantalini, H.T. Sun, M. Faccio, G. Ferri and M. Pelino (Monteluco di Roio, L'Aquila, Italy)	673
<b>Humidity Sensors</b>	
A study of low-cost sensors for measuring low relative humidity P.R. Story, D.W. Galipeau, R.D. Mileham (Brookings, SD, USA)	681
Sensor calibration of a SAW resonator for absolute humidity measurements in microelectronic packages P.H. Huang (Gaithersburg, MD, USA)	686
Humidity sensor durable at high humidity using simultaneously crosslinked and quaternized poly(chloromethyl styrene) Y. Sakai, Y. Sadaoka, M. Matsuguchi, H. Sakai (Matsuyama, Japan)	689
A thin-film polysulfone-based capacitive-type relative-humidity sensor T. Kuroiwa, T. Miyagishi, A. Ito (Fujisawa, Japan), M. Matsuguchi, Y. Sadaoka, Y. Sakai (Matsuyama, Japan)	692
A study of condensation and dew point using a SAW sensor D.W. Galipeau, J.D. Stroschine, K.A. Snow, K.A. Vetelino, K.R. Hines, P.R. Story (Brookings, SD, USA)	696
High-temperature humidity sensor using a limiting-current-type plane multi-oxygen sensor for direct firing system H. Yagi, K. Ichikawa (Iwasaki Komaki, Aichi, Japan)	701
Sol-gel processed TiO <sub>2</sub> -based thin films as innovative humidity sensors G. Montesperelli, A. Pumo, E. Traversa, G. Gusmano, A. Bearzotti (Rome, Italy), A. Montenero, G. Gnappi (Parma, Italy)	705
A capacitive-type humidity sensor using crosslinked poly(methyl methacrylate-co-(2 hydroxypropyl)-methacrylate) C. Roman, O. Bodea, N. Prodan, A. Levi, E. Cordos (Cluj-Napoca, Romania), I. Manovicu (Timisoara, Romania)	710
Study of the conduction mechanism of La <sub>2</sub> CuO <sub>4</sub> -ZnO heterocontacts at different relative humidities E. Traversa, A. Bearzotti (Rome, Italy), M. Miyayama, H. Yanagida (Tokyo, Japan)	714

**Ion Sensors**

- Disposable ion-selective electrodes ..... 721  
 M. Borchardt, C. Dumschat, K. Cammann, M. Knoll (Münster, Germany)
- All-solid-state potassium-selective electrode using double-layer film of polypyrrole/polyanion composite and plasticized poly(vinyl chloride) containing valinomycin ..... 724  
 T. Momma, S. Komaba, M. Yamamoto, T. Osaka (Tokyo, Japan), S. Yamauchi (Saitama, Japan)
- A solid membrane sensor for chromate ions ..... 729  
 A.K. Jain, L.P. Singh, P.K. Jain (Roorkee, India)
- Cu<sup>2+</sup>-selective thin films for chemical microsensors based on sputtered copper-arsenic-selenium glass ..... 733  
 E.A. Bychkov, M. Bruns, H. Klewe-Nebenius, G. Pfennig, W. Hoffmann, H.J. Ache (Karlsruhe, Germany)
- Models and methods of determining the transient response of ion sensors: comparison with impedance spectroscopy ..... 737  
 M. Attari (Saint Martin d'Hères, France and Algiers, Algeria), P. Fabry (Saint Martin d'Hères, France), G. Quezel, H. Mallié (Grenoble, France)
- Application of a proton-conducting electrolyte for a pH sensor ..... 741  
 L. Zerroual, L. Telli (Sétif, Algeria)

**Optical Sensors**

- Simultaneous determination of refractive index and absorbance spectra of chemical samples using surface plasmon resonance. .... 747  
 S.R. Karlsen, K.S. Johnston, R.C. Jorgenson, S.S. Yee (Seattle, WA, USA)
- Coulometric measuring system based on carbon felt electrode and glucose oxide. .... 750  
 F. Mizutani, S. Yabuki (Ibaraki, Japan)
- Optical viscosity sensor using forward light scattering ..... 753  
 W.-C. Wang, S.S. Yee, P.G. Reinhall (Seattle, WA, USA)
- Near-infrared surface plasmon resonance in silicon-based sensor: new opportunities in sensitive detection of biomolecules from aqueous solutions by applying microstep for discriminating specific and non-specific binding ..... 756  
 G. Brink, H. Sigl, E. Sackmann (Garching, Germany)
- Feasibility of evanescent wave interferometer immunosensors for pesticide detection: chemical aspects ..... 762  
 L.M. Lechuga, A.T.M. Lenferink, R.P.H. Kooyman, J. Greve (Enschede, Netherlands)

**Sensor Systems**

- Sources of systematic errors in chemical sensor chemometrics ..... 769  
 K. Cammann (Münster, Germany)
- Highly sensitive odour sensors using various SnO<sub>2</sub> thick films. .... 773  
 K. Suzuki, T. Takada (Osaka, Japan)
- Improvement of surface acoustic wave gas sensor response time using neural-network pattern recognition. .... 777  
 D. Rebière, C. Bordieu, J. Pistré (Talence, France)
- Design of sensor arrays by use of an inverse feature space ..... 781  
 G. Niebling, R. Müller (Munich, Germany)
- A systematic investigation on the use of time-dependent sensor signals in signal-processing techniques ..... 785  
 H.-E. Endres, W. Göttler, H.D. Jander, S. Drost (Munich, Germany), G. Sberveglieri, G. Faglia, C. Perego (Brescia, Italy)
- Continuous determination and discrimination of mixed odour vapours by a new chemiluminescence-based sensor system. .... 790  
 K. Utsunomiya, M. Nakagawa, N. Sanari, M. Kohata, T. Tomiyama, I. Yamamoto, T. Wada, N. Yamashita, Y. Yamashita (Okayama, Japan)
- Identification of aromas from wine using quartz-resonator gas sensors in conjunction with neural-network analysis .... 794  
 H. Nanto, S. Tsubakino, M. Ikeda, F. Endo (Ishikawa, Japan)
- Application of semiconductor gas sensor to quality control of meat freshness in food industry. .... 797  
 N. Funazaki, A. Hemmi, S. Ito, Y. Asano (Tokyo, Japan), Y. Yano (Ibaragi, Japan), N. Miura, N. Yamazoe (Fukuoka, Japan)
- Complex chemical pattern recognition with sensor array: the discrimination of vintage years of wine ..... 801  
 C. Di Natale, F.A.M. Davide, A. D'Amico (Rome, Italy), G. Sberveglieri, P. Nelli, G. Faglia, C. Perego (Brescia, Italy)
- Non-linear signal evaluation with linear regression techniques for redundant signals. .... 805  
 G. Niebling, R. Müller (Munich, Germany)

A composed neural network for the recognition of gas mixtures . . . . .	808
C. Di Natale, F.A.M. Davide, A. D'Amico (Rome, Italy), A. Hierlemann, J. Mitrovics, M. Schweizer, U. Weimar, W. Göpel (Tübingen, Germany)	
<b>Technology and Materials</b>	
Role and mechanism of the formation of hydrogen-induced interface states for platinum/silicon oxide/silicon MOS tunnelling diodes . . . . .	815
H. Kobayashi, H. Iwadate, Y. Nakato (Osaka, Toyonaka, Japan)	
Highly sensitive taste sensor with a new differential LAPS method . . . . .	819
Y. Sasaki, Y. Kanai, H. Uchida, T. Katsube (Urawa, Japan)	
Photocurable polymers applied as encapsulating materials for ISFET production . . . . .	823
A. Bratov, J. Muñoz, C. Dominguez, J. Bartrolí (Bellaterra, Barcelona, Spain)	
Double-layer granular SnO <sub>2</sub> sensors . . . . .	826
T. Aste, R. Botter, D. Beruto (Genoa, Italy)	
Structure identification of non-linear models for QMB polymer-coated sensors . . . . .	830
F.A.M. Davide, C. Di Natale, A. D'Amico (Rome, Italy), A. Hierlemann, J. Mitrovics, M. Schweizer, U. Weimar, W. Göpel (Tübingen, Germany)	
Hydrogen-sensing mechanism of zinc oxide varistor gas sensors . . . . .	843
F.-C. Lin, Y. Takao, Y. Shimizu, M. Egashira (Nagasaki, Japan)	
Optical CO detection by use of CuO/Au composite films . . . . .	851
M. Ando, T. Kobayashi, M. Haruta (Ikeda, Osaka, Japan)	
State of sensing technology development in China . . . . .	854
G. Feng, Y. Dong (Beijing, China)	
Application of the air-bridge microheater to gas detection . . . . .	857
M. Kimura (Tagajo, Miyagi, Japan), J. Manaka, S. Satoh, S. Takano, N. Igarashi, K. Nagai (Tokyo, Japan)	
Application of bistable nature of metal surface in aqueous solution to an oxygen sensor . . . . .	861
S. Asakura, A. Ishihara, H. Nakagawa, K. Fukuda (Yokohama-shi, Kanagawa-ken, Japan)	
Connectivity of pore networks in chemically sensitive materials . . . . .	865
H.-T. Sun, C. Cantalini, M. Faccio, G. Ferri, M. Pelino (L'Aquila, Italy), L. Zhang, X. Yao (Xi'an, China)	
Semiconductor/metal/gas behaviour through surface-potential change . . . . .	871
E. Souteyrand, D. Nicolas, J.R. Martin (Ecully, France)	
LB-based PAB immunosystem: activity of an immobilized urease monolayer . . . . .	876
S. Paddeu (Genoa-Sestri Ponente, Italy), A. Fanigliulo (Marciana LI, Italy), M. Lanzi, T. Dubrovsky, C. Nicolini (Genoa-Sestri Ponente, Italy)	
The effect of film oxygen content on SnO <sub>x</sub> gas-sensor selectivity . . . . .	883
D.S. Vlachos, C.A. Papadopoulos, J.N. Avaritsiotis (Athens, Greece)	
Surface composition of alkali-doped TiO <sub>2</sub> films for sensors investigated by XPS . . . . .	886
R. Zanoni (Rome, Italy), G. Righini (Monterotondo Stazione, Rome, Italy), A. Montenero, G. Gnappi (Parma, Italy), A. Bearzotti, G. Montesperelli, E. Traversa (Rome, Italy)	
Characterization of silicon transducers with Si <sub>3</sub> N <sub>4</sub> sensing surfaces by an AFM and a PAB system . . . . .	889
M. Adami, D. Alliata, C. Del Carlo, M. Martini, L. Piras, M. Sartore (Marciana LI, Italy), C. Nicolini (Genoa, Italy)	
Investigation of electrical properties of high-resistivity materials for solid-state sensors . . . . .	894
S.M. Vaezi-Nejad, C. Juhasz (London, UK)	
Chip-array electrodes for simultaneous stripping analysis of trace metals . . . . .	899
A. Uhlig, M. Paeschke, U. Schnakenberg, R. Hintsche, H.-J. Diederich, F. Scholz (Berlin, Germany)	
Application of a new technique for temperature-profile measurements in microheaters . . . . .	904
U. Zammit, F. Scuderi, M. Marinelli, G. Caruso, V. Foglietti, A. Bearzotti (Rome, Italy)	
Author Index of Volumes B24 and B25 . . . . .	907
Subject Index of Volumes B24 and B25 . . . . .	910

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.
